

# ENERGY EFFICIENCY

By Brady Rowe, Tanner Wilson,  
Chanston Bryant, and Quinn  
DePriest

# What to Teach to the State of Ohio

- Turn off lights when not needed
- Use solar and wind energy
- Use LED bulbs
- Energy conservation

# Money Saved

- Turning off four 20 watt bulbs for 9 hours will save about 7.2 cents
- Solar panels save \$2400 a year
- Led bulbs will save 85% of your electricity

# Why the state should listen

- ① Saves money
- ① Improves the economy
- ① Good for the environment
- ① Improves national security
- ① Improves quality life

# Why we need to be more energy efficient?

- Every year, much of the energy the U.S. consumes is wasted through transmission, heat loss and inefficient technology -- costing American families and businesses money, and leading to increased carbon pollution.
