Science Day

The following slides are from our science day that we held on February 13th.

Science Fair

This project was about sound energy.

Students worked from November to February researching, designing, experimenting, and displaying what they had learned.

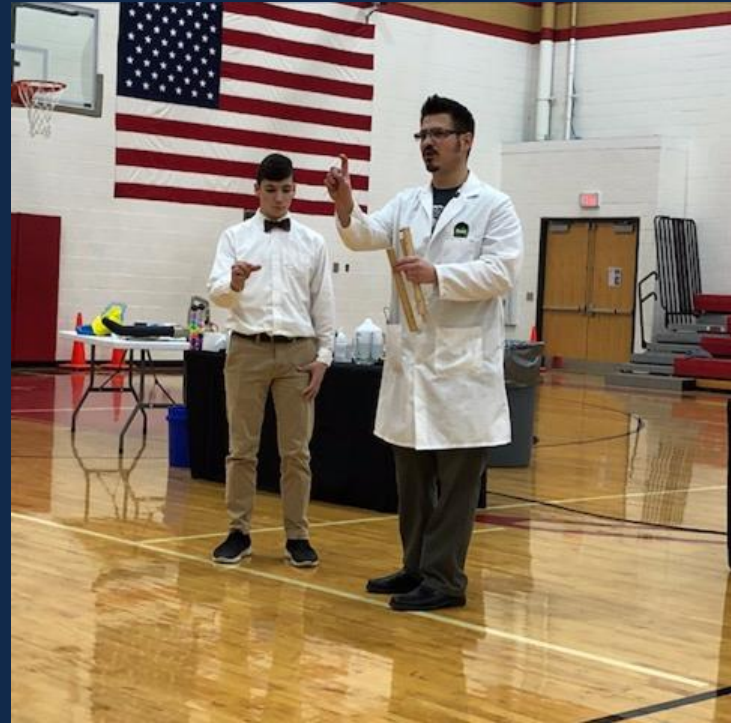

These students are being judged. Their project was about thermal energy.

Mister C came to our school and performed a science presentation. He taught students about science.

Science Presentation

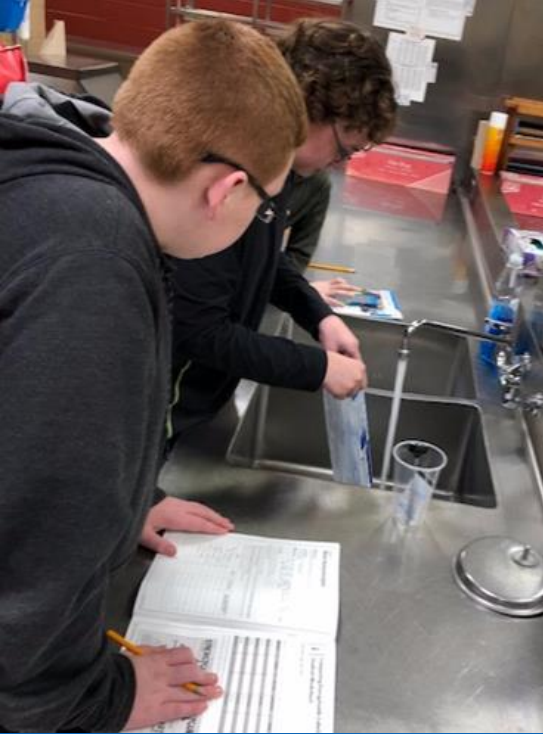

Energy Fair

Our school held an energy fair. Students invited their family members to the school to learn about energy.

Energy Experiments

Students performed many science experiments to teach them about energy.

Energy Summit

Several students took a trip to learn about energy. These students came back to the school and taught other students about what they had learned. It was a great learning experience for all.

Results Achieved

Throughout all our projects, we taught students about energy and enjoyed science experiments. Each of these middle school students benefited from the generous donations from AEP and Columbia Gas. Thank you so much for all you do for our education!!!!
