

- 1. My energy comes from the sun.**
- 2. I travel to the earth in the form of rays.**
- 3. My energy cannot be captured at night.**
- 4. I am free and clean, but require special equipment to generate electricity.**
- 5. I am renewable.**

- 2. I travel to the earth in the form of rays.**
- 3. My energy cannot be captured at night.**
- 4. I am free and clean, but require special equipment to generate electricity.**
- 5. I am renewable.**

1. I am a shiny black rock.

2. I am a fossil fuel because I come from tiny sea plants that died millions of years ago.

3. Burning me causes air pollution.

4. I am burned to generate electricity.

5. I am nonrenewable.

1. I am a shiny black rock.

2. I am a fossil fuel because I come from tiny sea plants that died millions of years ago.

3. Burning me causes air pollution.

4. I am burned to generate electricity.

5. I am nonrenewable.

- 1. I am made from living things, or things that were alive a short time ago.**
- 2. Trees, crops, garbage, and agricultural waste are examples of me.**
- 3. I can be burned to generate electricity.**
- 4. Burning me does not produce as much air pollution as burning coal or oil, but sometimes I smell bad.**
- 5. I am renewable.**

- 2. Trees, crops, garbage, and agricultural waste are examples of me.**
- 3. I can be burned to generate electricity.**
- 4. Burning me does not produce as much air pollution as burning coal or oil, but sometimes I smell bad.**
- 5. I am renewable.**

- 1. My energy is stored in the nucleus of an atom.**
- 2. I am a clean energy source, since no fuel is burned.**
- 3. My waste is radioactive and must be carefully stored.**
- 4. I am used to generate electricity.**
- 5. I am nonrenewable.**

- 3. My waste is radioactive and must be carefully stored.**
- 4. I am used to generate electricity.**
- 5. I am nonrenewable.**

- 1. I am energy from the heat inside the earth.**
- 2. Examples of me are volcanoes, geysers, and hot springs.**
- 3. I am a clean and cheap source of energy.**
- 4. Power plants can use my steam to make electricity.**
- 5. I am renewable.**

- 1. I am energy from the heat inside the earth.**
- 2. Examples of me are volcanoes, geysers, and hot springs.**
- 3. I am a clean and cheap source of energy.**
- 4. Power plants can use my steam to make electricity.**
- 5. I am renewable.**

- 1. I am a colorless, odorless gas. Bad smelling chemicals are added to me so leaks can be detected.**
- 2. I am a fossil fuel because I come from tiny sea plants and animals that died millions of years ago.**
- 3. I am used to generate electricity and heat homes.**
- 4. I am the cleanest burning fossil fuel.**
- 5. I am nonrenewable.**

- 2. I am a fossil fuel because I come from tiny sea plants and animals that died millions of years ago.**
- 3. I am used to generate electricity and heat homes.**
- 4. I am the cleanest burning fossil fuel.**
- 5. I am nonrenewable.**

- 1. I am energy from moving water.**
- 2. Dams are built across rivers when I am used to make electricity.**
- 3. My first electric power plant was built at Niagara Falls.**
- 4. I am a clean and cheap energy source. Sometimes creating electricity with me can cause fish and wildlife to lose their habitats.**
- 5. I am renewable.**

- 1. I am energy from moving water.**

- 3. My first electric power plant was built at Niagara Falls.**
- 4. I am a clean and cheap energy source. Sometimes creating electricity with me can cause fish and wildlife to lose their habitats.**
- 5. I am renewable.**

- 1. I am found underground. I am usually mixed with petroleum and natural gas.**
- 2. I am stored in tanks and could heat your home or power your BBQ grill.**
- 3. I am a fossil fuel because I come from tiny animals and plants that died millions of years ago.**
- 4. I am a gas. You can't see me, smell me, or taste me.**
- 5. I am nonrenewable.**

- 4. I am a gas. You can't see me, smell me, or taste me.**
- 5. I am nonrenewable.**

- 1. I am moving air.**
- 2. When I blow against the blades of a turbine, I generate electricity.**
- 3. I am made when the air over the land gets hotter than the air over water.**
- 4. I am free and clean, but I do make noise pollution.**
- 5. I am renewable.**

- 1. I am moving air.**
- 2. When I blow against the blades of a turbine, I generate electricity.**
- 3. I am made when the air over the land gets hotter than the air over water.**
- 4. I am free and clean, but I do make noise pollution.**
- 5. I am renewable.**

- 1. I am oil that is found underground in spaces between rocks.**
- 2. I am a fossil fuel because I come from tiny sea animals and plants that died millions of years ago.**
- 3. I can be turned into gasoline, kerosene, and even plastic.**
- 4. I am the most used energy source. I am used for transportation in cars, trucks, airplanes and trains.**
- 5. I am nonrenewable.**
